1. Patient Identification:

```
Patient ID, Patient Name, Date of Birth, Patient Age
@NotNull(message = " Patient ID should be Not Null!")
@Size(min = 11)
private int Patient ID;
@NotEmpty(message = " Patient Name should be Not Empty!")
@Size(min =10)
@Pattern(regexp="^[A-Za-z]*$", message = " Name Must contain only characters no numbers")
private String Patient Name;
@NotNull(message = " Date of Birth should be Not Null!")
@JsonFormat(pattern ="yyyy-MM-dd")
@PastOrPresent
private LocalDate Date of Birth;
@NotNull(message = " Patient Age should be Not Null!")
@Positive(message = " Patient Age must be a number")
@Min(value =12, message = " Patient Age must be more than 12")
private int age;
2. Contact Information:
Phone Number, Email Address
@Pattern(regexp = "(\05|0)[0-9]{9}", message = "Phone Number must start with '05' and have exactly 10 digits")
private String Phone Number;
@Email
private String Email Address;
3- login account:
username, password
@NotEmpty(message = username should be Not Empty!")
@Size(min = 4, max = 10, message = "username size should be between 4 - 10")
@Pattern(regexp="^[A-Za-z]*$", message = "username Must contain only characters no numbers")
private String username;
@NotEmpty(message = "password should be not empty!")
@Pattern(regexp = "^(?=.*[A-Za-z])(?=.*\\d)(?=.*[@$!%*#?&])[A-Za-z\\d@$!%*#?&]{8,}$")
 private String password;
4- payment method:
@Pattern(regexp="^[A-Za-z]*$", message = " username Must contain only characters no numbers")
private String username;
@NotEmpty(message = "password should be not empty!")
@Pattern(regexp = "^(?=.*[A-Za-z])(?=.*\\d)(?=.*[@$!%*#?&])[A-Za-z\\d@$!%*#?&]{8,}$")
 private String password;
@NotNull(message = "ID should be Not Null!")
@Size(min = 14)
private int id;
@NotNull(message = "Date should be Not Null!")
@JsonFormat(pattern ="yyyy-MM-dd")
@PastOrPresent
private LocalDate Date;
```
